

Consent

The solution that certifies online consents in compliance with the GDPR

Since the entry into force in 2018 of the General Data Protection Regulation (GDPR), the only valid consent to process data subjects' personal data is explicit consent.

eConsent allows you to mitigate the risk of non-compliance with a complete solution that collects, stores and manages consents.

Why use eConsent?

- Manage millions of consents efficiently and centrally.
- Enables traceability of the entire consent lifecycle.
- Simple and transparent integration via API.
- We act as a trusted third party for inspections and possible sanctions.
- In the cloud. Available 24/7.

Certifications

- Secure data centre on highly rated Amazon Web Services, EU-certified farm.
- Secure and certified https connection during data transfer.
- SOC 1/SSAE 16/ISAE 3402.
- SOC 2.
- ISO 27001.

Technical requirements

- Operating system: Microsoft Windows, Mac OS, Linux, Android, IOS.
- Multi-device: PC, laptop, tablet, mobile.
- Optimal screen resolution 1024 x 768 px.

Benefits

Centralise and certify online consents

- Can integrate with all the organisation's platforms through a simple code (script or API).
- Companies can obtain consents through forms on web pages, in which the user chooses what to accept, reject or modify.
- Companies can manage the catalogue of consents and preferences centrally.

Registering consents and revocations in blockchain

- All obtained consents are stored and saved on the blockchain by eConsent.
- Companies can prove who granted which consents, when and at what time, under which conditions and with which preferences.

Verifying and evidencing consents for commercial communications

- Companies can manage whitelisting for commercial actions.
- Companies can minimize possible reputational impacts by controlling and evidencing compliance in their commercial mailings.
- The certificate records all the modifications that the user has made to their consents.
