

MIA

THE FIRST **ARTIFICIAL INTELLIGENCE SOLUTION** THAT **DETECTS LEGAL VULNERABILITIES** TO AVOID HEAVY SANCTIONS.

MIA

MIA is the first Legal Breach Hunting solution with Artificial Intelligence that analyzes company information to detect legal vulnerabilities that can avoid heavy fines.

It is designed to detect legal breaches in multiple regulatory frameworks. MIA is trained in 27 articles of the GDPR and 57 articles of the Penal Code. In the last 3 years more than 680 penalties worth €595 million have been issued on these articles and its growth rate is 300% per year.

Artificial Intelligence

6 years of development and research with the Complutense University of Madrid.

Machine Learning

Continuous learning.

Regulatory Frameworks

Development and registration of proprietary algorithms.

Proprietary Algorithms

Development and registration of proprietary algorithms.

European Regulations

Solution adapted to European Regulations.

What is the origin of MIA?

MIA is the result of more than 6 years of research with the Complutense University of Madrid in which we have worked on the union of Law, Mathematics and Technology to give as a result MIA. This involved the development and registration of proprietary algorithms as well as numerous analyses, tests and configurations to result in an autonomous solution with high learning capacity.

How does it work?

Uninterrupted 7x24 service to avoid legal risks.

MIA is continuously available. It is always operational.

Permanently updated regulatory frameworks.

MIA is trained in the detection of non-compliance in 27 articles of the RGPD and 57 articles of the Penal Code.

Maximum security level guaranteed.

Service in SaaS and On Premise mode. With the SaaS mode, the updates of the Regulatory Frameworks would be done automatically and in the On Premise model, it would be updated manually.

Analyzes .com, .xls, .pdf documents with continuous or on-demand analysis typology.

MIA can perform on-demand analysis of specific documents and also set a continuous analysis of a specific folder or data repository.

Useful for any sector and/or activity.

MIA performs an analysis of all business sentences, focusing on the most sanctioned Normative Frameworks and articles.

Addressees and uses

Management and Board of Directors

- Legal shield against sanctions
- Due Diligence
- Legal
- Purchases/Mergers

Legal Counsel, DPO, Compliance Officer

- Sanctions Legal Shield
- Ensuring Compliance
- Ensuring Third Party Compliance
- Antivirus
- Legal

Financial Management and Procurement

- Due Dilligence
- Legal
- Procurement/Mergers
- Ensuring Third Party Compliance

CISO, Technical Area

- Legal shield against sanctions
- Antivirus
- Legal

MIA

It is the first Artificial Intelligence solution in Breach Hunting Legal, analyzing the information of organizations to detect legal vulnerabilities that can lead to heavy fines. We are a Startup that unites Mathematics, Law and Technology to offer solutions that help in the detection and legal diagnostics of organizations.

Our mission is to develop solutions that allow companies, with the minimum cost and investment in personnel, to guarantee their legal security.
